ContracTech

Company Profile

Say it once.

General Contracting and Technology Solutions

2026

About ContracTech

ContracTech

ContracTech is a Saudi professional services company working in two complementary divisions: General Contracting and Technology Solutions.

Our Technology division is a full low-current (ELV) integrator: CCTV, access control, public address, IPTV, telephony and networks, designed, installed, commissioned and maintained to government compliance requirements.

Our Contracting division delivers construction, low-voltage electrical and maintenance works, from routine maintenance contracts to complete construction scopes.

Clients get one accountable partner for the building and the systems that run and protect it, backed by more than 30 years of team experience in security and low-current systems.

We serve the whole Kingdom, including distant minor cities and remote areas, and go wherever the project is.

Our Purpose

ContracTech

Purpose	To be the one team a client trusts with the building and everything that runs and protects it.
Our line	Say it once. You describe what you need once, to one partner, and we take the building and its systems from design to maintenance.

Our Values

ContracTech

1 **Professionalism**

Qualified teams and work done to standard.

2 **Timely Execution**

Committed schedules, delivered on time.

3 **Effective Client Communication**

Clear updates at every stage of the work.

4 **Quality of Service**

Workmanship we stand behind after handover.

Our Team

ContracTech

Eng. Turki AlTurki

General Manager

Business development, client relationships, engineering design and proposals.

Eng. Kamal Asif

Low-Current and Electrical Systems Lead

More than 30 years in security, low-current (ELV) and low-voltage electrical systems: design, supply, installation, testing and commissioning.

Eng. Mahmoud Rashad

Construction Manager

More than 10 years in construction, renovation and maintenance works on site.

Our Divisions

ContracTech

General Contracting

- Construction works
- Electrical and mechanical systems
- Facility and site renovation
- Maintenance services

Technology Solutions

- CCTV and security systems
- Low-current: PA, IPTV, telephony
- Networks and structured cabling
- Systems maintenance

General Contracting

ContracTech

1	**Construction Works**	Execution of defined construction scopes for commercial, private and industrial projects.
2	**Electrical and Mechanical Systems**	Installation, upgrade and repair of electrical, HVAC, plumbing and mechanical systems.
3	**Facility and Site Renovation**	Fit-out, refurbishment and upgrade of existing buildings and sites: painting, tiling and gypsum ceilings.
4	**Maintenance Services**	Planned and corrective maintenance contracts that keep facilities running, with reports of findings and recommendations.

Electrical Works (Low Voltage)

ContracTech

1	**Power and Lighting**	Power, lighting and lighting-control circuits; sockets, switches and isolators; insulation testing.
2	**LV and ELV Cabling**	Laying, pulling, terminating, testing and labelling cables for data, voice, video, sound and control.
3	**Cable Containment**	Cable trays, ladders, raceways, bus ducts, riser feeders, EMT and PVC conduit, and trunking.
4	**Earthing and Lightning Protection**	Rod, plate and mat earthing, lightning protection, exothermic welding, soil treatment and earth-resistance tests.
5	**LV Distribution and Control**	Distribution panels, MCCs, air circuit breakers, manual and automatic transfer switches, busways, UPS and batteries.

Low-Current (ELV) Systems

ContracTech

One integrator for every low-current system in the building: design, supply, installation, testing, commissioning and maintenance, in the brands your project specifies.

Security

- CCTV surveillance
- Access control and time attendance
- Intrusion detection

Communication

- Public address and background music
- Analog and VoIP telephony
- Nurse call and intercom
- Master clock systems

TV and audio-visual

- Central satellite TV (SMATV)
- IPTV
- Audio-visual and sound systems

Networks

- Structured cabling
- Data networking
- Computer and server rooms

Security Systems

ContracTech

1	**CCTV Surveillance**	High-resolution cameras, recorders (NVR), video management software and analytics, from a small office to a multi-site enterprise.
2	**Access Control and Time Attendance**	Card readers, biometrics, turnstiles and smart locks, for one door or a whole campus, linked to CCTV and time attendance.
3	**Intrusion Detection**	Detection and alarm systems that secure perimeters, entry points and critical areas.
4	**One Integrated Platform**	CCTV, access control, intrusion and intercom working as one system: simpler to run and less costly to operate.

Communication, TV and Audio-Visual

ContracTech

Public Address and Background Music

Zoned paging, background music and emergency announcements, with clear sound everywhere.

IPTV and SMATV

Live TV, video on demand and custom channels in HD and 4K, linked to the hotel PMS and digital signage.

IP Telephony and VoIP

Voice and video calls over one network, on site or in the cloud, with call management and recording.

Nurse Call and Intercom

Patient-to-nurse calling and building intercom for hospitals, clinics and residences.

Master Clock

One synchronised time on every clock in the building.

Audio-Visual and Sound

Sound, projection and displays for meeting rooms and halls.

Networks and Computer Rooms

ContracTech

1	**Structured Cabling**	Copper and fibre for voice, data and video: design, installation, labelling, testing and certification.
2	**Data Networking**	Switching, Wi-Fi, racks and cabinets, active and passive components, for reliable networks that grow with you.
3	**Computer and Server Rooms**	Raised floors, cable containment, UPS sizing, environmental control, electrical wiring, room security (access control and CCTV) and full documentation.

How We Design CCTV Systems

ContracTech

Each system is engineered from the operational requirement of every area, not from a camera count or a brand.

1. We define the level of detail each area must deliver (observation, recognition, identification or number-plate reading) to the international standard IEC 62676-4.
2. We choose the right camera for each area from mounting height, distance and night-time lighting, with alternatives and a clear reason for each choice.
3. We size storage, the video recorder (NVR) and drives to the retention period required.
4. We design the PoE network and cabling within TIA-568 limits, with an exact count of cable and accessories.
5. We deliver a technical proposal with a site map, bill of materials and links to the manufacturer's datasheets, stamped once approved.

Renovation

ContracTech

See it before we build it, and see why it costs what it costs.

1. A simple phone questionnaire in Arabic or English: room photos, preferred style and colours.
2. An engineer's site survey: defects, the recommended action and a mandatory safety checklist.
3. Illustrative visuals of the expected result, and a finishes schedule with real colour codes.
4. A priced bill of quantities, a programme in working days and a payment schedule.
5. A handover report with before, during and after photos, signed off by the client item by item.

How We Work

ContracTech

From the first call to after handover.

1	2	3	4	5	6	7
We listen	**Site survey**	**Design**	**Clear proposal**	**Execution**	**Handover**	**Aftercare**
Your needs, budget and timing.	Sizes, condition and safety checks.	Engineered design and quantities, every figure sourced.	Detailed technical and commercial offer before work starts.	On programme, with regular follow-up.	Photo report, signed off by the client.	Maintenance and support.

Why ContracTech

ContracTech

One partner

Contracting and technology under one management.

We reach every site

The whole Kingdom, including remote areas.

Documented engineering

Every figure in our proposals has a formula or a manufacturer source.

Clear costs

A detailed bill of quantities that shows why each cost is there.

Experienced team

More than 30 years in security and low-current systems, and more than 10 in construction.

After handover

Photo reports and maintenance services.

Selected Projects

ContracTech

Swissôtel Living Jeddah

Low-voltage electrical works

Umm Al-Qura University

Low-voltage and low-current systems

Ministry of Media

MEP and HVAC works across several contracts

JD Logistics

CCTV, maintenance and renovation works

AJEX Logistics Services

CCTV and civil maintenance works
