ContracTech

Company Profile

General Contracting and Technology Solutions

Kingdom of Saudi Arabia · 2026

About ContracTech

ContracTech

ContracTech is a Saudi professional services company working in two complementary divisions: General Contracting and Technology Solutions.

Our Technology division designs, installs and maintains CCTV, network infrastructure and security systems that meet government compliance requirements.

Our Contracting division delivers construction and maintenance works, from routine maintenance contracts to full execution of defined construction scopes for commercial, private and industrial projects.

Clients get one accountable partner for both the building and the systems that run and protect it.

We serve the whole Kingdom, including distant minor cities and remote areas. Our teams mobilise to the site wherever the project is.

Vision and Mission

ContracTech

Vision

To be the trusted partner for contracting and technology solutions in every region of the Kingdom.

Mission

We deliver engineered contracting and technology solutions, on time, with clear communication and quality we stand behind from design to maintenance.

Our Values

ContracTech

1 **Professionalism**

Qualified teams and work done to standard.

2 **Timely Execution**

Committed schedules, delivered on time.

3 **Effective Client Communication**

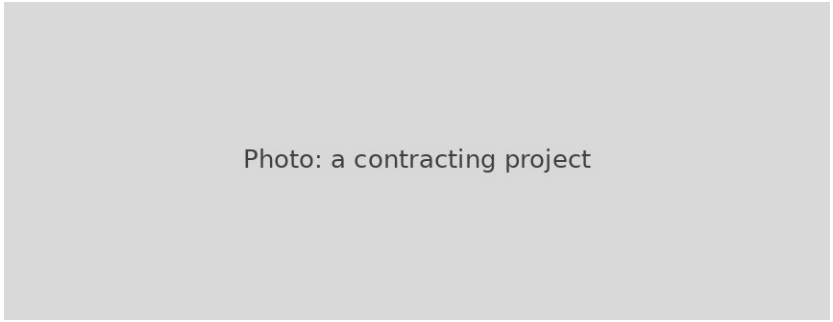

Clear updates at every stage of the work.

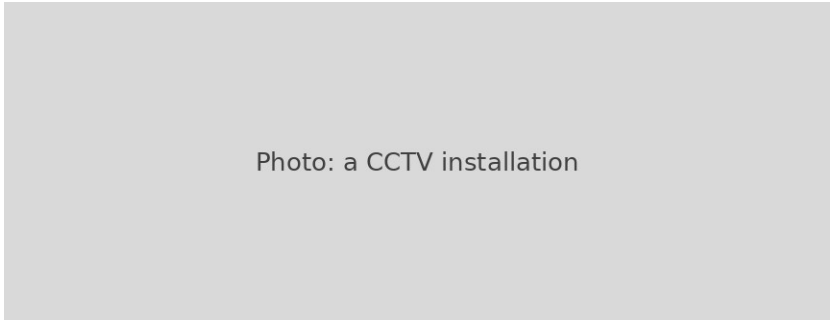

4 **Quality of Service**

Workmanship we stand behind after handover.

Our Divisions

ContracTech

General Contracting

- Construction works
- Electrical and mechanical systems
- Facility and site renovation
- Maintenance services

Technology Solutions

- CCTV systems
- IT and network solutions
- Intrusion and alarm systems
- Systems maintenance

General Contracting

ContracTech

1	**Construction Works**	Execution of defined construction scopes for commercial, private and industrial projects.
2	**Electrical and Mechanical Systems**	Installation, upgrade and repair of electrical, HVAC, plumbing and mechanical systems.
3	**Facility and Site Renovation**	Fit-out, refurbishment and upgrade of existing buildings and sites: painting, tiling and gypsum ceilings.
4	**Maintenance Services**	Planned and corrective maintenance contracts that keep facilities running, with reports of findings and recommendations.

Technology Solutions

ContracTech

1	**CCTV Systems**	Surveillance design, supply and installation to compliance standards, in the brand you specify.
2	**IT and Network Solutions**	Structured cabling, switching, Wi-Fi and network infrastructure for reliable connectivity.
3	**Intrusion and Alarm Systems**	Detection and alarm systems that secure perimeters, entry points and critical areas.
4	**Systems Maintenance**	Preventive maintenance and fast support to keep security and network systems operational.

How We Design CCTV Systems

ContracTech

We design around what you need to see, not around a camera count or one brand.

1. We set what each area must achieve (general watch, recognising people, identifying faces or reading number plates) to the international standard IEC 62676-4.
2. We choose the right camera for each area from mounting height, distance and night-time lighting, with alternatives and a clear reason for each choice.
3. We size storage, the video recorder (NVR) and drives to the retention period required.
4. We design the PoE network and cabling within TIA-568 limits, with an exact count of cable and accessories.
5. We deliver a technical proposal with a site map, bill of materials and links to the manufacturer's datasheets, stamped once approved.

Renovation

ContracTech

See it before we build it, and see why it costs what it costs.

1. A simple phone questionnaire in Arabic or English: room photos, preferred style and colours.
2. An engineer's site survey: defects, the recommended action and a mandatory safety checklist.
3. Illustrative visuals of the expected result, and a finishes schedule with real colour codes.
4. A priced bill of quantities, a programme in working days and a payment schedule.
5. A handover report with before, during and after photos, signed off by the client item by item.

Before

After

How We Work

ContracTech

From the first call to after handover.

1	2	3	4	5	6	7
We listen	**Site survey**	**Design**	**Clear proposal**	**Execution**	**Handover**	**Aftercare**
Your needs, budget and timing.	Sizes, condition and safety checks.	Engineered design and quantities, every figure sourced.	Detailed technical and commercial offer before work starts.	On programme, with regular follow-up.	Photo report, signed off by the client.	Maintenance and support.

Why ContracTech

ContracTech

One partner

Contracting and technology under one management.

We reach every site

The whole Kingdom, including remote areas.

Documented engineering

Every figure in our proposals has a formula or a manufacturer source.

Clear costs

A detailed bill of quantities that shows why each cost is there.

On time

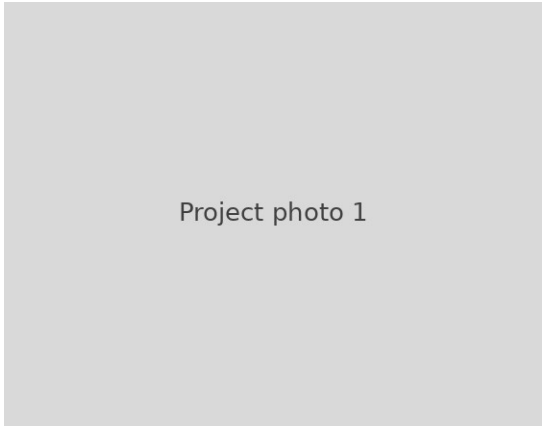

A clear programme and regular follow-up.

After handover

Photo reports and maintenance services.
